

Source/UniversityProject
/Character/Weapon/UPWeapon.h

```
graph BT; A["Source/UniversityProject /Character/UPCharacterBase.cpp"] --> C["Source/UniversityProject /Character/Weapon/UPWeapon.h"]; B["Source/UniversityProject /Character/Weapon/UPWeapon.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a grey box representing a header file: 'Source/UniversityProject /Character/Weapon/UPWeapon.h'. Below it are two white boxes representing source files. The left box is 'Source/UniversityProject /Character/UPCharacterBase.cpp' and the right box is 'Source/UniversityProject /Character/Weapon/UPWeapon.cpp'. Two blue arrows point from the top of each source file box to the bottom of the header file box, indicating that both source files include the header file.
